DECLARATION

I am Mrinmoy Pal, a student of BBA in HOSPITAL MANAGEMENT from PAILAN COLLEGE OF MANAGEMENT AND TECHNOLOGY, Kolkata Campus under MAULANA ABUL KALAM AZAD UNIVERSITY OF TECHNOLOGY (FORMERLY KNOWN AS WBUT).

I hereby declare that my project report prepared and submitted by using Survey, Internet and Faculty's help. This is totally is an independent and real work and the references have been mentioned previously.

The project work has been undertaken as necessity with regard to internship facility by Tata Medical Centre, , 14, MAR(E-W), DH Block(Newtown), Action Area I, Newtown, Kolkata, West Bengal 700160, India

**Signature of
student**

APPROVAL OF DEPARTMENT

He has worked under my guidance and supervision. He has learned many things working in OPD (Out Patient Department) at TATA MEDICAL CENTER CANCER HOSPITAL & RESEARCH CENTER, KOLKATA for 90 days (10.09.2021 – 17.12.2021). He was very regular and sincere towards her responsibility. I hope this experience will help her in future.

Mrs. Aparna Roy
(General Manager-Operations)

Mr Subhasis Mukherjee
(HR Head)

ACKNOWLEDGEMENT

This project required a lot of guidance and assistance from many people and I am

extremely privileged to have got this all along the processing of my project that

continues till date.

All that I have done is only due to such supervision and assistance and I would not

forget to thank them.

I would like to thank the Tata Medical Center, Head of Dept(Human-Resource)

Mr. Suvasish Mukherjee(Sir) and respected Operations Manager Mrs. Aparna

Roy(Mam) and her team members & other parallel faculty as well as executives

Mr. Birupakshya Mukheerjee, Ranit Roy &

last but not the least my fellow mates & my parents whose constant sustenance has

all along, till date of the project work that needs more consolidation & dedication

for its successful completion.

MRINMOY PAL

BBA IN-HOSPITAL MANAGEMENT

OBJECTIVE

Healthcare institutions are primarily patient centric. Patient satisfaction is the strongest determinant of hospital functioning. Ultimate goal of the hospital is satisfaction of its customers.

1. The main objective of the study is to know about the hospital facilities.
2. To know the aim of this organisation.
3. To know more about the Out Patient Department.
4. To find out the proper solution for the problems occurring in the OPD.
5. To assess the patient satisfaction with the OPD services provided.
6. To study the different factors affecting patient satisfaction.
7. To know the responsibilities of the staff members working in the Customer Care Department.

Introduction

About the Hospital

Tata Medical Centre in Kolkata was created as philanthropic institution by the Domicile of Tata in 2005 to serve the high demand of medical services in the eastern region of India. Tata Medical Centre in Kolkata serves a comprehensive cancer care centre that provides:

- **Prevention**: The early detection and cure from the disease like cancer is the primary objective at the Tata Medical Centre delivering each & every day to the patients visiting the hospital.
- **Diagnosis**: The doctors with specialized departments with respect to the various branches of Oncology are assigned in the centre that maintains a strict guideline for Cancer diagnosis.
- **Treatment**: All the treatments relating to the form and type of cancer that needs an accurate treatment are provided here with units of various Surgery, Chemotherapy & Radiation therapy.

All of the services are maintained & regulated through highly trained medical professionals. The hospital has bed strength of 437 & recently working for more to its best, out of which 50% are delegated for subsidized use. Tata Medical Centre is concentrating on a Paediatric Oncology project for the age groups of 0 to 14 years and a Palliative Care up gradation are in their planners.

The Hospital, with a compacting 437 beds, serves all sections of the society, with 75% of the infrastructure earmarked for subsidized treatment for the underprivileged sections. The Institution's objective is to excel in service, education and research. Diagnosis and

treatment are

OPD reception (right)

Characterized by a multi-disciplinary approach with disease management teams. The hospital is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and contemporary medical equipment. The Hospital provides a wide spectrum of services from complete diagnosis to multimodality therapy, from prerehabilitation to rehabilitation and Psycho oncological support to palliative care. The Institution's objective is to excel in cancer care, patient service, education and research.

The main hospital campus is one of the three institutions established for management of cancer, the other two being Premashraya (an accommodation facility for outstation patients & their relatives) and the Tata Translational Cancer Research Centre (TTCRC). While TTCRC is located within the main campus of the hospital, Premashraya is located within 1 km distance.

Diagnosis and treatment are characterised by a multi-disciplinary approach with disease management teams, wherein experts from different streams, viz., Surgical Oncology, Radiation Oncology, Medical Oncology, Pathology, Radiology, and other clinical and support groups participate in decision-making for treatment protocols, using evidence-based medicine strategies and documented clinical guidelines appropriate to our location. The above facilities are complemented by state-of-the-art equipment from the best of manufacturers worldwide, and supported by advanced technologies like Digital and Molecular Imaging, Molecular Pathology, Robotic Surgery and the latest Radiation treatment delivery systems.

The treatment teams are complemented by support services including Medical Social Workers, Rehabilitation Services (Physiotherapy, Speech Therapy), Stoma Care, Dental and Prosthodontics. They are supported by NGOs and other voluntary organizations whose services include counselling, financial aid and patient navigation. The following graphic gives a snapshot of services provided by TMC

VISION

To evolve as a State of Art, Self-sustainable, Oncology Centre, equipped with latest technology and best expertise in extending standard of care holistic cancer management under one roof with global standards of outcomes and results. To significantly contribute to Education and Research in the field of Oncology and join hands to fight The Battle against Cancer, on a national and International level and take Oncology to newer horizons of success and advancement

Be a not-for-profit, state-of-the-art, tertiary care, oncology centre, that provides world class, affordable treatment and care to cancer patients.

MISSION

To deliver comprehensive, ethical Cancer Management in a safe and comfortable environment with a tireless attitude of Compassion, Concern, Cure and Care and to create a high standard of Teaching and Learning, to promote a wide spectrum of academics, training and research activities in the field of Oncology.

To promote prevention, early diagnosis, treatment, palliation, rehabilitation and care for cancer patients.

GOAL

Tata Medical Center aims at delivering the boons of highly advanced technology
along with experience and expertise to assure the patients of maximum comfort
and reliability.

LEGACY OF INSTITUTIONS

Tata's endeavour to strengthen the fabric of India has manifested itself in multiple ways. A crucial component of the Tata idea of nation building was, and remains, the creation and sustaining of exceptional institutions of learning, research, knowledge and intellectual capital

Indian Institute of Science: IISc has produced Nobel laureates, trained many of India's greatest scientists and helped nurture some of the country's finest scientific institutions. Housed in a 375-acre campus in Bangalore, this trailblazing institution has 40 departments and centres pursuing R&D and teaching in all departments of science, engineering and technology. As it strides into the second century of its existence, the Indian Institute of Science has cemented its place in India's history www.iisc.ernet.in

JRD Tata Eco technology Centre: The flag bearer of the Eco technology Movement in India, JRDTEC is part of the MS Swami Nathan Research Foundation, Chennai. Established in 1996, it is devoted to seeding and encouraging sustainable development, one that protects the environment while also benefiting the people who depend on it.

Tata Institute of Fundamental Research: The need to improve India's scientific temper and strengthen the nation's science infrastructure were the objectives that drove scientist Homi J Bhabha and JRD Tata, the then Chairman of the Tata Group, to pursue their vision of establishing TIFR in Mumbai back in 1945.

Tata Institute of Social Sciences: Set up in 1936, TISS is a pioneer in the field of social-work education in the Asia-Pacific region. The Institute, which offers Postgraduate and Doctoral programs, has made significant contributions in the domains of social policy and planning, intervention strategies and human resource development.

Tata Memorial Hospital: TMC is India's best-known Cancer Hospital and Research Centre. This global centre of excellence, where 70 per cent of patients get free primary care, was established in Mumbai in 1941, a time when there were only a handful of such institutions in the world. It has added significantly to its capacity and capabilities since then. tmc.gov.in

HOSPITAL ACCREDITATION

Quality Assurance and Control

The Quality Assurance & Control Department at TMC has its primary objective of setting up of the departmental processes and systems in line with best practices, optimizing process outcome and ensuring patient satisfaction and safety of environment of care and occupants.

One of the prime objectives of the department is to obtain national and international accreditation for the different departments and processes at TMC. The Blood Bank of the facility is accredited with National Accreditation Board for Hospitals and Healthcare Providers (NABH). The Laboratory services are accredited from National Accreditation Board for Testing and Calibration Laboratories (NABL) and the hospital processes are being designed for accreditation by the National Accreditation Board for Hospitals and Healthcare Providers (NABH) and the Joint Commission International (JCI). The blue prints of the facility have already been reviewed by Joint Commission International Consulting (JCIC) and had been found to be in coordination with international facility safety standards.

We strive to achieve:

- Transformation of the Organization's Vision and Mission into a Quality Improvement Framework.
- Ensure all organizational practices are targeted towards one common goal-Patient Satisfaction, Optimum Care Outcome Safety.
- Planning, formation and implementation of systems and process- in line with International Standards and Best Practices. Continuous monitoring of processes and outcomes to ensure that performance meets desirable standard – through internal and external surveillance, multidisciplinary committees, integration of monitoring measures

into the processes, continuous training and development, feedback mechanisms. f
monitoring measures into the processes, continuous training and development, feedback
mechanisms.

OVERVIEW OF DEPARTMENTS

PHASES OF TATA MEDICAL CENTER: The Tata Medical Centre is broadly divided into 2 phases, connected by a sky walk.

PHASE 1(Old building) & PHASE 2(new building)

Ground floor	Main Reception Appointment Desk Billing Counter/ Registration Desk Gm Operations Office Room Insurance/Corporate Desk Social Assessment Desk Sample Collection OPD Reception-General & Private OPD Nursing Station Radiology Department Radiotherapy Department Blood Bank Staff Cafeteria Pharmacy Administration Office
1st floor	Daycare Department Emergency Department Dental Physiotherapy PAC Clinic Palliative OPD Paediatric OPD General Ward(Bed No-1-46) South Lab/Molecular Genetics/Clinical Chemistry/Hematology/Microbiology/Virology

	Covid Lab Reporting Staff Cafeteria
2nd floor	Operation Theatre ICU HDU Surgical ward

3rd floor	Private Ward VIP Rooms(1-4) Isolation Room (only 2 Rooms For Radio Iodine Theraphy-Post Thyroidectomy Patients)-Bed- 9/10
4th floor	Private Ward (Bed No- 29-43) Stem Cell Transplant Unit / Bone Marrow Testing or Transplant Unit (BMT)

PHASE 2

Basement	Radiation Therapy Central Sterile Supply Central Housekeeping Laundry
Ground floor	Main Reception Appointment Desk Billing Counter/ Registration Desk Admission Desk Insurance/Reimbursement Desk Social Assessment Desk OPD Reception-General & Private OPD Nursing Station Sample Collection Visitor's Cafeteria Emergency Department
1st floor	Radiology & Diagnostic Imaging Gastroenterology Department/Endoscopy/PFT Histopathology Lab/North Lab Education Block/Auditorium/Seminar Room IP Pharmacy Transport Desk Teleconsultant Room
2nd floor	Isolation Ward Paediatric General Ward Pediatric Isolation & PICU Inpatient discharge room

3rd floor	Isolation Ward General Ward (Bed No- 47-81) Daycare In Patient Discharge Room
4th floor	General Ward (Bed No- 117-186)
5th floor	Private Ward (Bed No: 44-71) VIP-5 / VIP-6

SPECIALIZED DEPARTMENT

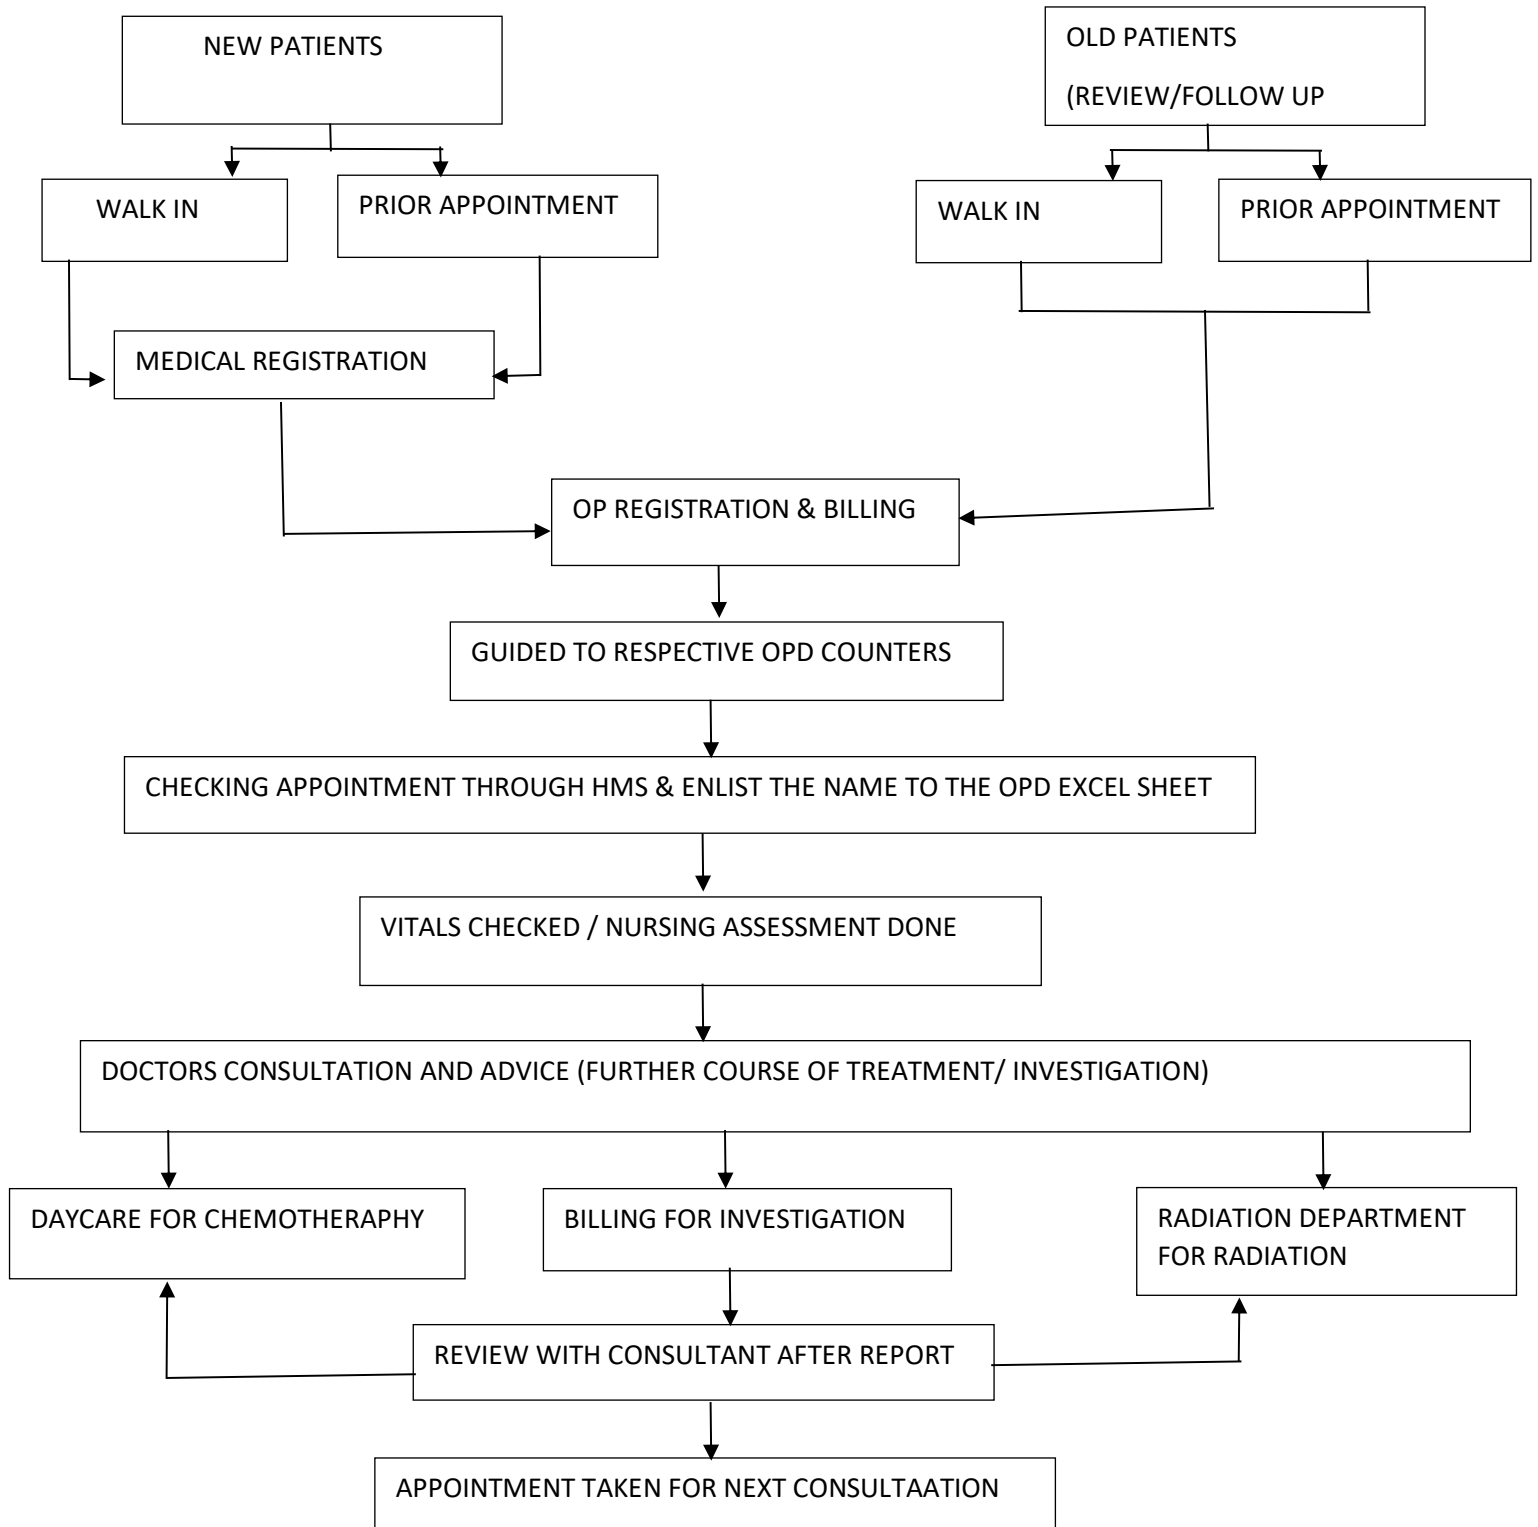

OUTPATIENT SERVICES

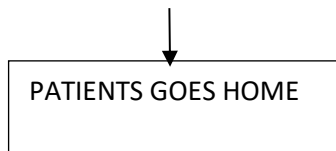

The Out Patient Department (OPD) in Tata Medical Centre aims to provide a comprehensive set of services for patient evaluation and treatment.

Specialist Consultations – Patients and their family members can meet doctors for diagnosis, treatment decisions and follow-up. Apart from oncology doctors, cancer patients can access services of other specialists in medicine, dentists, psychologists, counsellors and social workers for a patient's other medical and psychosocial needs.

- **Laboratory Services** – An entire range of laboratory are available, including several molecular and genetic tests. There will be special sample collection booths for patient convenience.
- **Diagnostic Radiology and Nuclear Medicine** – All types of X-rays, USG, CT and MRI scans are available. Modern nuclear imaging modalities like a 64 slice CT-PET, a SPECT scanner further aid in diagnosis and staging.
- **Day-care Surgery and Endoscopy** – Many small surgical procedures are performed on an outpatient basis without the need for admission and stay. These include biopsies, stent placements, minimal access surgeries and some laser procedures. A state-of-the-art endoscopy suite aid in diagnosis as well as endoscopic treatment procedures.
- **Radiation Therapy** – Daily radiation treatments on high-precision equipment are delivered on an outpatient basis.
- **Day-care Chemotherapy** – Many types of chemotherapy and other injections or transfusions are delivered in a modern and well-equipped day-care. Special clinics will handle care of catheters for chemotherapy infusions.
- **Rehabilitation Services** – Special clinics on physiotherapy and occupational therapy, speech and swallowing therapy, stoma and catheter care are a part of the wide array of outpatient services.

OPD WORKFLOW PATTERN:-

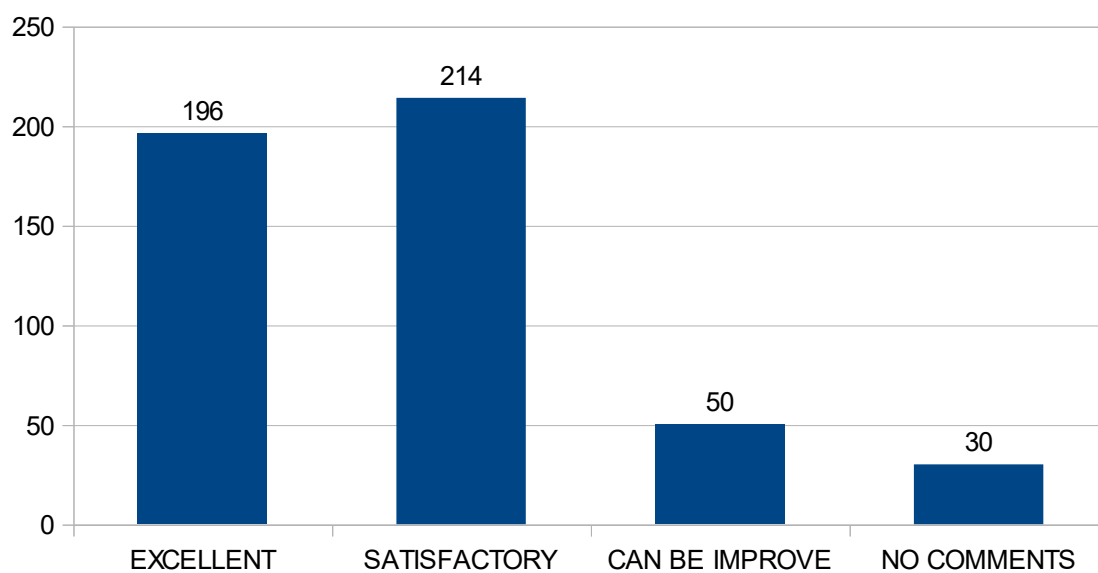

OPD FEEDBACK ANALYSIS & GRAPHICAL REPRESENTATION

The health care system is basically a service-based industry and customer experiences and satisfaction is of the utmost importance just as in other services-oriented systems. It becomes an important indirect marketing tool as it has direct impact on improving the quality of the „product“ i.e., health service.

OBSERVATION

Patient satisfaction is an indicator of how well the patient is being treated at the hospital. It refers to the quality of care but also to how happy a patient is with the treatment he or she received. It is a measure of care quality and gives healthcare providers valuable insights into various aspects of healthcare, including the effectiveness of their care and their level of understanding.

1. In OPD there has no problem regarding billing and registration service.
2. Patients has an issue with appointment service, when they got appointment over the phone, it's not clear to know that his/ her that whether he/ she has an appointment or not.
3. Nursing and laboratory service are also good in OPD. The Radiology services are quite good in the hospital & the patients were satisfied with the services they are providing.
4. A major problem faced by the hospitals when it comes to running the OPD is the extended waiting periods and overcrowding. The waiting period is one of the most important indicators of quality of service. Thus, a prolonged waiting time directly reflects on the quality of service being provided. Many patients have complained about it.
5. There should be need to separate report delivery counter for the patients who are not able to download their investigation reports online.

CONCLUSION

Most of the respondents were satisfied with the availability of services, waiting time, professional care provided by consultant in OPD, behaviour of consultant, nurses and paramedical staff's. They were unsatisfied with toilet and drinking water facility present in OPD, approach to pharmacist, understanding illness after consultation with doctor and difficulty in telling private thing with doctor. So it is recommended that as OPD services are an important part of health care services in hospital, they need to be improve with special emphasis on improving toilet facility, drinking water facility and approach to the pharmacist and therefore hospital should develop patient feedback system which is vital for quality of services.
